TANAYA GALEA | 5.1A B.A IN GRAPHIC DESIGN

1. What the website is about and its purpose

The proposed website is a movie archive and cinema guide designed to help users discover, explore, and keep track of films in a simple and visually engaging way. The platform combines an organised collection of movies with beginner-friendly guidance, enabling users to make informed decisions about what to watch.

The primary purpose of the website is to simplify movie discovery. Many existing platforms, such as IMDb or streaming services, contain vast databases and excessive information, which can overwhelm users. This Website addresses this issue by presenting films in a clear, structured, and user-friendly manner, offering concise summaries, embedded trailers, and easy navigation.

In addition to browsing movies, the website introduced several interactive features:

- **Seen Movies Functionality:** Users can mark movies as watched and view them in a dedicated section.
- **Profile Page:** Provides a personalised space where users can view their watched movies and preferences.
- **Movie Suggestion Q&A:** A short question-and-answer process that recommends movies based on the user's mood or interests.

These features enhance user engagement and provide a more personalised and supportive experience for individuals who may be unsure about what to watch.

Key Objectives

- Simplify the process of discovering movies.
- Provide clear and concise information about each film.
- Support beginner users with guided recommendations.
- Allow users to track movies they have watched.
- Offer personalised suggestions through an interactive Q&A.
- Create a visually appealing and accessible user experience.

2. List of Website Pages and Their Functionalities

1. Homepage

Purpose: Introduces the website and directs users to the main features.

Functionalities:

- Welcome section
- Featured movie or highlighted category
- Navigation menu
- Button leading to the archive
- Button leading to the Q&A suggestion tool

2.Movie Archive Page

Purpose: Allows users to browse the movie collection.

Functionalities:

- Grid of movie posters
- Short descriptions
- Genre or category tags
- Links to movie detail page
- Search or filter options

3. Movie Detail Page

Purpose: Gives detailed information about each film.

Functionalities:

- Movie poster and title
- Synopsis
- Genre, year, duration
- Embedded trailer
- Related recommendations
- “Mark as Seen” button

4. Top 3 Movies Page

Purpose: Shows quick recommendations.

Functionalities:

- Three highlighted movies
- Short reason for each choice

- Links to detail pages

5. Seen Movies Page

Purpose: Displays all movies marked as watched.

Functionalities:

- Watched movie grid
- Visual watched indicator
- Links back to detail pages

6. Profile Page

Purpose: Gives users a personal area within the website.

Functionalities:

- Profile name and avatar area
- List of watched movies
- Favourite genres or preferences
- Quick access to suggestions and saved activity

7. Movie suggestion

Purpose: Helps users find movies through a short question-and-answer process.

Functionalities:

- Simple multiple-choice questions
- Questions based on mood, genre, or viewing situation
- Final suggested movie result
- Link to the recommended movie page

8. Contact Page

Purpose: Lets users suggest new movies for the website.

Functionalities:

- Name field
- Email field
- Movie suggestion field
- Message box
- Submit button opening email client with pre-filled message

3. TARGET AUDIENCE

User Personas

Jade Mallia

20 | University Student | Malta

About:

She enjoys watching movies in her free time, especially during weekends or study breaks. She often watches films with friends but finds it difficult to decide what to watch due to the overwhelming number of options available on streaming platforms.

Need for the website:

- To quickly find movie recommendations.
- To explore films in a visually organised way.
- To keep track of movies she has already watched using the Seen Movies feature.
- To use the Find My Movie Q&A when she is unsure about what to watch.

Frustrations:

- Too many choices on streaming platforms.
- Long and complex reviews on sites like IMDb.
- Difficulty finding movies based on mood or situation.

Difficulties / Special Needs:

- Requires a mobile-friendly and responsive design.
- Prefers short summaries rather than lengthy text.
- Benefits from visual browsing using movie posters.
- Needs clear and simple navigation.

Aiden Cachia

25 | Office Admin | Malta

About:

He has recently developed an interest in cinema and wants to explore films beyond mainstream blockbusters. However, he lacks knowledge about different genres and feels unsure about where to start.

Need for the website:

- To receive guided recommendations through the Find My Movie Q&A.
- To learn about films through clear and concise descriptions.
- To explore different genres in an organised archive.
- To track his viewing progress using the Profile and Seen Movies features.

Frustrations:

- Use of complex film terminology.
- Over-reliance on ratings rather than explanations.
- Overwhelming amount of information.

Difficulties / Special Needs:

- Needs simple, jargon-free language.
- Prefers structured and well-organised categories.
- Benefits from step-by-step guidance when choosing a movie.
- Requires accessible and readable content.

Emma Attard
32 | Event Coordinator | Malta

About:
Claire enjoys organising movie nights with friends and family. She often needs quick and reliable recommendations that suit different audiences and occasions.

Need for the website:

- To quickly find group-friendly movie suggestions.
- To use the Top 3 Movies page for fast decision-making.
- To keep track of previously watched films through the Seen Movies and Profile pages.
- To rely on the Find My Movie Q&A for tailored recommendations.

Frustrations:

- Streaming platforms provide too many options without clear guidance.
- Ratings do not always indicate whether a movie is suitable for group viewing.
- Time-consuming search processes.

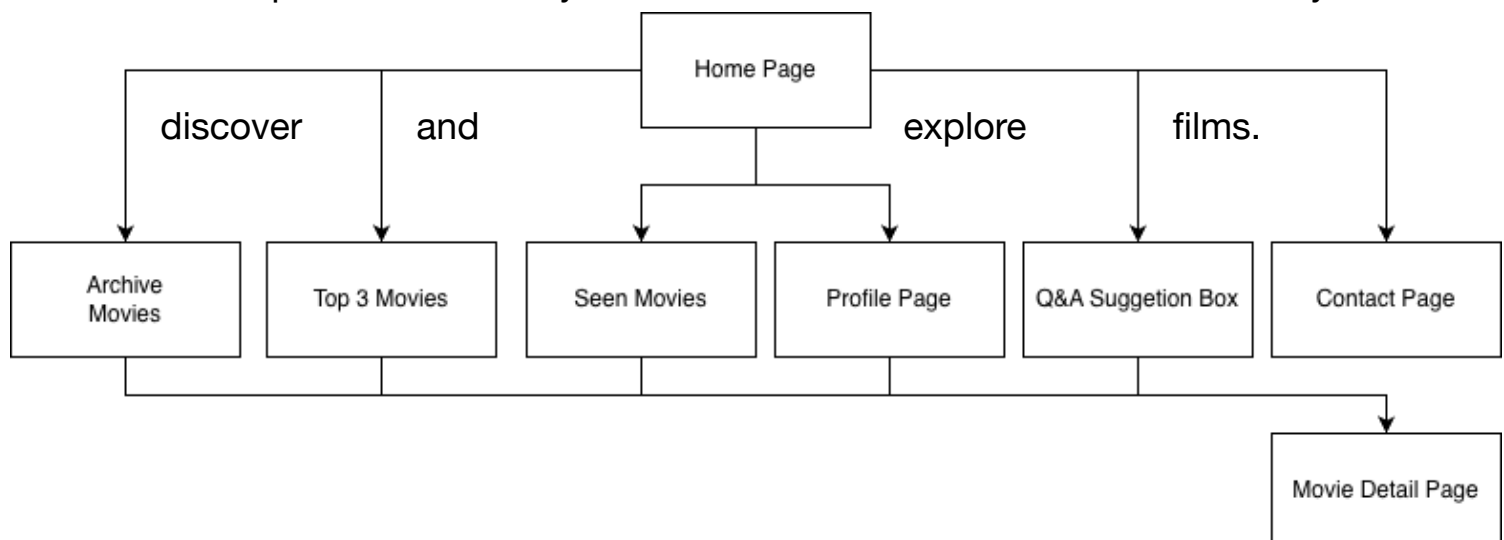

Difficulties / Special Needs:

- Requires quick navigation and easy-to-scan content.
- Needs clear visual hierarchy and readable typography.
- Benefits from accessible design, including good colour contrast.
- Prefers concise and practical recommendations.

4. Design Planning

Site Map

The site map illustrates the hierarchal structure of the Movie Archive & Cinema Guide website. The homepage serves as the central navigation hub, providing access to all primary sections, including the Movie Archive, Top 3 Movies, Seen Movies, Profile Page, Movie suggestion Q&A, and Contact Page. A shared Movie Detail Page is accessible from multiple sections, ensuring consistent navigation and efficient information architecture. This structure promotes usability and allows users to easily

5/ ^{seen movies} ~~Movie~~ ~~Text~~ Page

The diagram illustrates a movie theater layout. At the top, a horizontal bar represents the stage area, containing a small rectangle with an 'X' (likely a screen or logo) and a long oval with a small circle inside (possibly a spotlight or a decorative element). Below this, a large rectangular area is divided by a central aisle and two side aisles, creating three main seating sections. Each section contains several rows of seats, represented by short horizontal lines. The front of the theater features a row of five square boxes, each with an 'X' inside, representing individual seats or stalls. The entire layout is enclosed within a rectangular border.

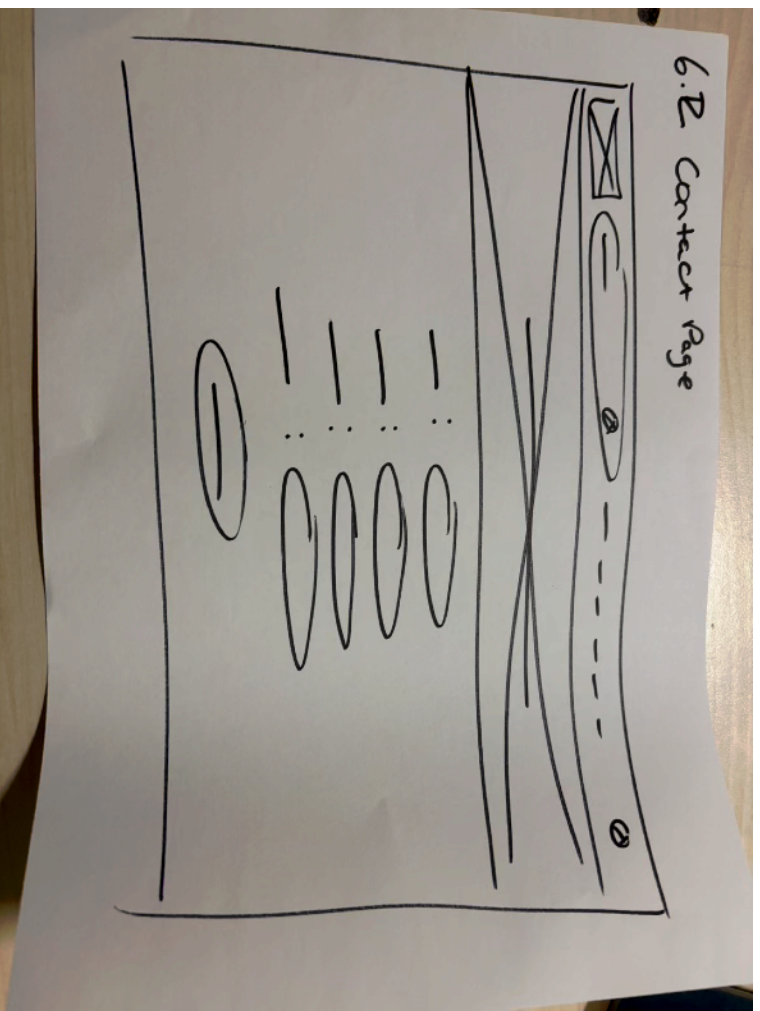

5.2 Watched Movies

The diagram illustrates a user interface for 'Watched Movies'. It features a header bar with three icons: a magnifying glass, a filter icon, and a list icon. Below the header is a grid of four movie cards. Each card consists of a placeholder image (a square with an 'X') and a list of horizontal lines representing text. At the bottom of the interface is a footer bar with three icons: a magnifying glass, a filter icon, and a list icon.
