## IPO Chart - Homepage

| INPUT                              | PROCESS                            | OUTPUT                                                              |
|------------------------------------|------------------------------------|---------------------------------------------------------------------|
| User opens homepage                | Loads main Chapterly landing page  | Homepage is displayed                                               |
| User clicks navigation links       | Redirects to selected page         | Bookshelves, Contact, Discover, Profile or Notifications page opens |
| User views current reading section | Displays book currently being read | "Before the Coffee Gets Cold" appears                               |
| User clicks Discover               | Opens Discover Page                | User can explore more books                                         |

## IPO Chart - Discover Page

| INPUT                       | PROCESS                        | OUTPUT                                                |
|-----------------------------|--------------------------------|-------------------------------------------------------|
| User opens Bookshelves page | Loads saved reading categories | Finished, Want to read and Favourites sections appear |
| User checks categories      | Organises books by shelf type  | User can view book groups                             |
| User uses navigation        | Moves to another page          | Selected page opens                                   |

## IPO Chart - Contact Page

| INPUT                   | PROCESS                            | OUTPUT                                     |
|-------------------------|------------------------------------|--------------------------------------------|
| User opens Contact page | Loads contact information and form | Email, phone number and form are displayed |

|                          |                               |                                 |
|--------------------------|-------------------------------|---------------------------------|
| User enters full name    | Accepts name input            | Name is placed in form          |
| User enters email        | Accepts email input           | Email is placed in form         |
| User write message       | Accepts message input         | Message is placed in form       |
| User clicks send message | Submits contact form visually | Message appears ready to send   |
| User clicks cancel       | Cancels from action           | Form is cleared or action stops |

## IPO Chart - Profile Page

| INPUT                       | PROCESS                        | OUTPUT                                 |
|-----------------------------|--------------------------------|----------------------------------------|
| User opens profile page     | Loads user profile information | Profile greeting appears               |
| User views reading progress | Displays progress percentage   | 90% reading process shown              |
| User views genres           | Loads top genre cards          | self-help , romance and thriller shown |
| User views friends          | Displays friend list           | Friend 1, friend 2 and friend 3 appear |

## IPO Chart - Notifications Page

| INPUT                          | PROCESS                                 | OUTPUT                                    |
|--------------------------------|-----------------------------------------|-------------------------------------------|
| User opens notifications page  | Loads notification section              | Notifications page appears                |
| System displays recommendation | Shows latest book notification          | "Read the midnight library today" appears |
| User views timestamp           | Displays when notification was received | "1hr ago" is shown                        |

## IPO Chart - Book Detail Page

| INPUT                       | PROCESS                         | OUTPUT                              |
|-----------------------------|---------------------------------|-------------------------------------|
| User opens book detail page | Loads selected book information | Book title and author are displayed |
| User views description      | Displays book summery           | Book description is shown           |
| User uses navigation        | Redirects to another page       | Selected page opens                 |

## Test Case Tables

### Test Case Table - Homepage

| TEST CASE              | EXPECTED RESULT               | ACTUAL RESULT                | STATUS |
|------------------------|-------------------------------|------------------------------|--------|
| Open homepage          | Homepage loads correctly      | Homepage loaded              | worked |
| Click discovery link   | Discovery page opens          | Page opened                  | worked |
| Click bookshelves link | Bookshelves page opens        | Page opened                  | worked |
| Click contact link     | Contact page opens            | Page opened                  | worked |
| Check page layout      | Content is clear and readable | Layout was displayed clearly | worked |

### Test Case Table - Discovery page

| TEST CASE                  | EXPECTED RESULT                 | ACTUAL RESULT             | STATUS |
|----------------------------|---------------------------------|---------------------------|--------|
| Open discovery page        | Book recommendations appear     | Recommendations displayed | worked |
| View book cards/images     | Books are visible               | Books appeared clearly    | worked |
| Click navigation links     | Correct pages open              | Links worked              | worked |
| Check content organisation | Sections are easy to understand | Content was organised     | worked |

## Test Case Table - bookshelves page

| TEST CASE             | EXPECTED RESULT              | ACTUAL RESULT           | STATUS |
|-----------------------|------------------------------|-------------------------|--------|
| Open bookshelves page | Bookshelves sections appear  | Sections loaded         | worked |
| View book categories  | Books are grouped clearly    | Categories were visible | worked |
| Check images/content  | Book visuals and text appear | Content displayed       | worked |
| Use navigation bar    | User can move to other pages | Navigation worked       | worked |

## Test Case Table - Contact page

| TEST CASE          | EXPECTED RESULT               | ACTUAL RESULT               | STATUS            |
|--------------------|-------------------------------|-----------------------------|-------------------|
| Open contact page  | Contact form appears          | Form displayed              | worked            |
| Type name          | Name field accepts text       | Text entered                | worked            |
| Type email         | Email field accepts text      | Text entered                | worked            |
| Type message       | Message box accepts text      | Message entered             | worked            |
| Click send message | Form should submit or respond | No clear confirmation shown | Didn't fully work |
| Click cancel       | Form should reset or cancel   | Cancel action unclear       | Didn't fully work |

## Test Case Table - Profile page

| TEST CASE             | EXPECTED RESULT             | ACTUAL RESULT              | STATUS      |
|-----------------------|-----------------------------|----------------------------|-------------|
| Open profile page     | Profile information appears | Profile loaded             | worked      |
| View reading progress | Progress is displayed       | Progress shown             | worked      |
| View genre cards      | Genres appear clearly       | Genres displayed           | worked      |
| View friends section  | Friend list appears         | Friends displayed          | worked      |
| Click friend profiles | Friend profiles should open | No clickable functionality | Didn't work |

|                          |                                               |                          |             |
|--------------------------|-----------------------------------------------|--------------------------|-------------|
|                          |                                               | available                |             |
| Edit profile information | User should be able to update profile details | No edit option available | Didn't work |

## Test Case Table - Notifications page

| TEST CASE                  | EXPECTED RESULT                   | ACTUAL RESULT                          | STATUS      |
|----------------------------|-----------------------------------|----------------------------------------|-------------|
| Open notifications page    | Notifications page loads          | Page loaded                            | worked      |
| View notifications message | Message is visible                | Notification displayed                 | worked      |
| View time label            | Time appears correctly            | Time shown                             | worked      |
| Use navigation             | User can go to other pages        | Navigation worked                      | worked      |
| Mark notification as read  | Notification should change status | No read/unread functionality available | Didn't work |
| Delete notification        | Notification should be removable  | No delete option available             | Didn't work |

## Test Case Table - Book Detail page

| TEST CASE                | EXPECTED RESULT                        | ACTUAL RESULT                           | STATUS      |
|--------------------------|----------------------------------------|-----------------------------------------|-------------|
| Open book detail page    | Book detail appear                     | Details loaded                          | worked      |
| View title and author    | Title and author are readable          | Information displayed                   | worked      |
| View description         | Book summary appears                   | Description displayed                   | worked      |
| Use navigation           | User can return to other pages         | Navigation worked                       | worked      |
| Add book to bookshelf    | Book should be added to a shelf        | No add-to-shelf functionality available | Didn't work |
| Leave a review or rating | User should be able to submit a review | Review feature not implemented          | Didn't work |

# W3C HTML Validator

## HOMEPAGE VALIDATOR

The Homepage did not fully pass HTML validation. Several errors were identified during testing, including invalid HTML structure, unclosed elements, stray closing tags, and image file paths containing spaces. The validator also detected a button nested inside an anchor element, which is not compliant with HTML standards.

These issues may affect browser compatibility, accessibility, and overall code quality.

To resolve these problems, image filenames should be renamed without spaces, all HTML elements should be properly opened and closed, and the navigation button should be restructured using either a styled anchor element or a standalone button.

After implementing these corrections, the homepage would achieve a higher level of standards compliance and maintainability.

1. **Error** The element `button` must not appear as a descendant of the `a` element.  
From line 96, column 13; to line 96, column 20  
`<button>Discov`
2. **Error** Bad value `book cover.jpg` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.  
From line 104, column 13; to line 104, column 55  
``
3. **Error** End tag `div` seen, but there were open elements.  
From line 112, column 17; to line 112, column 22  
`</div>`
4. **Error** Unclosed element `button`.  
From line 110, column 17; to line 110, column 43  
`<button class="resume-btn">`
5. **Error** Stray end tag `button`.  
From line 113, column 13; to line 113, column 21  
`</button>`
6. **Error** End tag `section` seen, but there were open elements.  
From line 114, column 9; to line 114, column 18  
`></section>`
7. **Error** Unclosed element `div`.  
From line 103, column 9; to line 103, column 34  
`><div class="current-book">`
8. **Error** Stray end tag `div`.  
From line 115, column 5; to line 115, column 10  
`tion></div><`
9. **Error** Bad value `photos/1984 book.jpg` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.  
From line 122, column 17; to line 122, column 61  
``
10. **Error** Bad value `photos/just for the summer book.jpg` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.  
From line 123, column 17; to line 123, column 76  
``
11. **Error** Bad value `photos/never lie book.jpg` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.  
From line 124, column 17; to line 124, column 66  
``
12. **Error** Bad value `photos/normal people bok.jpg` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.  
From line 125, column 17; to line 125, column 69  
``

## DISCOVER PAGE VALIDATOR

The Discover page did not fully pass HTML validation. Several errors were identified during testing, primarily relating to incorrect HTML syntax and image file paths. A malformed `<link>` element was detected in the document head, resulting in duplicate attributes, missing quotation marks, and invalid attribute values. Multiple image source paths contained spaces and special characters, which are not permitted in valid HTML file paths. The validator also identified nested anchor elements, where an `<a>` tag was opened before a previous anchor had been closed.

Additionally, one section element lacked a heading, generating an accessibility warning. These issues may affect browser compatibility, accessibility, and website maintainability. To improve the page, image filenames should be renamed without spaces, anchor tags should be correctly structured, the malformed link element should be corrected, and all sections should contain appropriate headings. Implementing these changes would significantly improve the page's HTML validity and overall quality.

1. **Error** No space between attributes.

At line 7, column 28

```
ef=<link rel="preconnect" hre
```

2. **Error** Quote " in attribute name. Probable cause: Matching quote missing somewhere earlier.

At line 7, column 38

```
rel="preconnect" href="https:/
```

3. **Error** Duplicate attribute href.

At line 7, column 44

```
reconnect" href="https://fonts
```

4. **Error** Bad value <link rel= for attribute href on element link: Illegal character in path segment. < is not allowed.

From line 7, column 5: to line 7, column 75

```
eet"><link href=<link rel="preconnect" href="https://fonts.googleapis.com"><
```

5. **Error** Attribute preconnect not allowed on element link at this point.

From line 7, column 5: to line 7, column 75

```

19. **Warning** Section lacks heading. Consider using `h2`~`h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.  
From line 91, column 5: to line 91, column 35  
`<section class="discover-page">`

## BOOKSHELVES PAGE VALIDATOR

The Bookshelves page did not fully pass HTML validation. The validator identified multiple errors related to image file paths. Most of the image filenames contain spaces, special characters, and punctuation marks, which are not permitted in valid HTML file paths. As a result, the image source attributes generated validation errors throughout the page. Although the images may still display in some browsers, these naming conventions reduce standards compliance and may lead to compatibility issues. To resolve these errors, all image filenames should be renamed using hyphens or underscores instead of spaces and special characters. Once the file paths are corrected and updated within the HTML code, the page would achieve improved validation results and better maintainability.

1. **Error** Bad value `photos/26 Books That Need To Be Made Into A Movie Or TV Series ASAP.webp` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.  
[From line 94, column 17: to line 94, column 113](#)  

```

```
2. **Error** Bad value `photos/Beautiful World, Where Are You.jpg` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.

## CONTACT PAGE VALIDATOR

The Contact page produced a small number of validation errors during testing. The validator identified an unclosed `<section>` element, which resulted in the closing

`</body>` tag being encountered before all page elements had been properly closed. This type of structural error can affect how browsers interpret and render the page. In addition, the validator generated an accessibility warning because the contact section does not contain a heading element. While this warning does not prevent the page from functioning, adding a heading would improve accessibility and document structure. To resolve these issues, all HTML elements should be properly opened and closed, and an appropriate heading should be added to the contact section. These changes would improve code quality, accessibility, and HTML standards compliance.

- Error** End tag for `body` seen, but there were unclosed elements.  
From line 148, column 5, to line 148, column 11  
`</body>`
- Error** Unclosed element `section`.  
From line 89, column 5, to line 89, column 37  
`<section class="contact-section">`
- Warning** Section lacks heading. Consider using `h2` - `h6` elements to [add identifying headings to all sections](#), or else use a `div` element instead for any cases where no heading is needed.  
From line 89, column 5, to line 89, column 37  
`<section class="contact-section">`

## PROFILE PAGE VALIDATOR

The Profile page did not fully pass HTML validation due to issues with image file paths. The validator identified image source attributes containing spaces, special characters, emojis, and non-Latin characters within the file names. These characters are not permitted in valid HTML file paths and generated validation errors. Although the images may still display correctly in some browsers, using complex filenames can reduce compatibility and make website maintenance more difficult. To improve validation results, all image files should be renamed using simple filenames containing only letters, numbers, hyphens, or underscores. Updating the image source paths within the HTML code would resolve these errors and improve the overall quality of the webpage.

- Error** Bad value `photos/레드크리스탈의 로고 속에는 팬지꽃이 있어요_팬지의 꽃말은 "나를 기억해 주세요"_많은 사람들의 기억 속에 오래 남는 브랜드가 되고 싶은 마음을 담아 상징 로고로 만들었어요_그 마음이 전해졌는지, 레드크리스탈을 기억해 주는 분들이 점점 많아지고 있어요_이럴 때 정말 뿌듯합니다❤️.webp` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.  
From line 135, column 21, to line 135, column 217  
``
- Error** Bad value `photos/name moodboard_order for _nikki_ _ want one_ _ mood cafe.webp` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.  
From line 140, column 21, to line 140, column 116  
``

# NOTIFICATION PAGE VALIDATOR

The Notifications page generated a validation error during testing due to an incorrectly structured HTML document. The validator detected a second opening `<body>` tag while another body element was already open. HTML documents are only permitted to contain one body element, therefore this created a validation error. Although the page may still display correctly in most browsers, duplicate body tags can cause inconsistencies in page rendering and reduce standards compliance. To resolve this issue, the extra `<body>` tag should be removed and the document structure should be reviewed to ensure that only one body element exists within the HTML file. Correcting this error would improve code quality and HTML validation results.

1. **Error** Start tag `body` seen but an element of the same type was already open.  
[From line 84, column 5; to line 84, column 10](#)

`<body>`

# BOOK PAGE DETAIL #1 VALIDATOR

Book Page #1 did not fully pass HTML validation. The validator identified several structural and accessibility issues within the page. A duplicate `<body>` tag was detected, resulting in an invalid document structure. An image source path contained spaces, generating a validation error because spaces are not permitted in valid HTML file paths. The validator also detected a stray `<script>` tag, indicating that the script element was placed incorrectly or not properly structured within the document. Additionally, an accessibility warning was generated because the page skips from a level 1 heading (`h1`) directly to a level 3 heading (`h3`), creating an improper heading hierarchy. These issues may affect browser compatibility, accessibility, and overall code quality. Correcting the HTML structure, renaming image files, properly placing script elements, and maintaining a logical heading order would improve validation results and standards compliance.

1. **Error** Start tag `<body>` seen but an element of the same type was already open.  
[From line 84, column 5; to line 84, column 10](#)  
`<body>`
2. **Error** Bad value `photos/The Cat and The City by Nick Bradley _ Waterstones.jpg` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.

3. **Error** Stray start tag `script`.  
[From line 107, column 5; to line 107, column 28](#)  
`<script src="script.js"></scri`
4. **Error** The heading `h3` (with computed level 3) follows the heading `h1` (with computed level 1), skipping 1 heading level.  
[From line 94, column 17; to line 94, column 20](#)  
`<h3>By Nic`

## BOOK PAGE DETAIL #2 VALIDATOR

Book Detail Page #2 did not fully pass HTML validation. Several validation errors were identified during testing, including an incorrectly structured HTML document and invalid image file paths. The validator detected a duplicate `<body>` tag, which is not permitted as an HTML document should contain only one body element. Additionally, the image source path contains spaces and special characters, generating a validation error. A stray `<script>` tag was also identified, suggesting that the script element was not placed correctly within the document structure. Furthermore, an accessibility warning was generated because the page skips directly from a level 1 heading (`h1`) to a level 3 heading (`h3`), resulting in an improper heading hierarchy. These issues may impact accessibility, browser compatibility, and code maintainability. Correcting the HTML structure, renaming image files, repositioning the script element, and following a logical heading order would improve the page's validation results and overall quality.

- Error** Start tag `body` seen but an element of the same type was already open.  
From line 84, column 5 to line 84, column 10  

```
<body>
```
- Error** Bad value `photos/We'll Prescribe You Another Cat by Syou Ishida, E_Madison Shimoda _ Waterstones.jpg` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.

```

## BOOK PAGE DETAIL #3 VALIDATOR

Book Detail Page #3 did not fully pass HTML validation. Several validation errors were identified during testing, including issues with the overall document structure and image file naming conventions. The validator detected a duplicate `<body>` tag, which is not permitted in a valid HTML document. An image source path containing spaces and special characters also generated a validation error, as these characters are not recommended in file paths. Additionally, a stray `<script>` tag was identified, indicating that the script element was not correctly positioned within the HTML structure. The page also generated an accessibility warning due to an incorrect heading hierarchy, where a level 3 heading (`h3`) follows a level 1 heading (`h1`) without a level 2 heading (`h2`) in between. These issues may affect accessibility, browser compatibility, and maintainability. Correcting the document structure, updating image filenames, properly placing script elements, and using a logical heading structure would improve the page's validation results and overall quality.

1. **Error** Start tag `body` seen but an element of the same type was already open.  
[From line 84, column 5; to line 84, column 10](#)  

```
<body>
```
2. **Error** Bad value `photos/Convenience Store Woman – Sayaka Murata.jpg` for attribute `src` on element `img`: Illegal character in path segment. Space is not allowed.

# W3C CSS VALIDATOR

## Homepage Validator

The Homepage CSS stylesheet was successfully validated using the W3C CSS Validator. No CSS errors or warnings were detected during testing, indicating that the stylesheet follows CSS Level 3 standards correctly. The validation confirms that the styling code is well-structured, syntactically correct, and compatible with modern web browsers. As a result, the homepage benefits from consistent visual presentation, improved maintainability, and better standards compliance.

W3C CSS Validator results for TextArea (CSS level 3 + SVG)

Congratulations! No Error Found.

## Discover Page Validator

The Discover page CSS stylesheet was successfully validated using the W3C CSS Validator. No CSS errors or warnings were identified during testing, indicating that the stylesheet complies with CSS Level 3 standards. The results demonstrate that the styling code is correctly structured and implemented, contributing to a consistent visual appearance and reliable browser compatibility. The absence of validation errors also improves maintainability and ensures that the page follows current web development standards.

W3C CSS Validator results for TextArea (CSS level 3 + SVG)

Congratulations! No Error Found.

# BOOKSHELVES PAGE VALIDATOR

The Bookshelves page CSS stylesheet was successfully validated using the W3C CSS Validator. No CSS errors or warnings were detected during testing, confirming that the stylesheet complies with CSS Level 3 standards. The validation results indicate that the styling code is correctly structured and implemented, contributing to a consistent layout and visual appearance throughout the page. The absence of validation errors improves browser compatibility, maintainability, and overall code quality. This demonstrates that good CSS development practices were followed during the creation of the Bookshelves page.

W3C CSS Validator results for TextArea (CSS level 3 + SVG)

Congratulations! No Error Found.

# CONTACT PAGE VALIDATOR

The Contact page CSS stylesheet was successfully validated using the W3C CSS Validator. No CSS errors or warnings were identified during testing, indicating that the stylesheet complies with CSS Level 3 standards. The validation confirms that the styling code is correctly written and follows current web development practices. As a result, the Contact page benefits from consistent styling, improved browser compatibility, and easier maintenance. The successful validation demonstrates that the CSS implementation is reliable and contributes positively to the overall user experience.

Congratulations! No Error Found.

# PROFILE PAGE VALIDATOR

The Profile page CSS stylesheet was successfully validated using the W3C CSS Validator. No CSS errors or warnings were detected during testing, confirming that the stylesheet complies with CSS Level 3 standards. The validation results demonstrate that the styling code is well-structured, syntactically correct, and compatible with modern web browsers. This contributes to a consistent visual appearance, improved maintainability, and a better user experience. The successful validation indicates that appropriate CSS coding practices were followed throughout the development of the Profile page.

W3C CSS Validator results for TextArea (CSS level 3 + SVG)

Congratulations! No Error Found.

# NOTIFICATIONS PAGE VALIDATOR

The Notifications page CSS stylesheet was successfully validated using the W3C CSS Validator. No CSS errors or warnings were detected during testing, confirming that the stylesheet complies with CSS Level 3 standards. The validation results indicate that the styling code is correctly structured and implemented according to current web development standards. This contributes to consistent visual presentation, improved browser compatibility, and easier maintenance of the website. The successful validation demonstrates that good CSS coding practices were followed throughout the development of the Notifications page.

W3C CSS Validator results for TextArea (CSS level 3 + SVG)

Congratulations! No Error Found.

## BOOK DETAIL PAGE VALIDATOR

The Book Detail Page CSS stylesheet was successfully validated using the W3C CSS Validator. No CSS errors or warnings were detected during testing, confirming that the stylesheet complies with CSS Level 3 standards. The validation results demonstrate that the styling code is well-structured, correctly implemented, and compatible with modern web browsers. This contributes to a consistent visual design, improved maintainability, and a positive user experience. The successful validation indicates that appropriate CSS development practices were followed throughout the creation of the Book Detail Page.

Congratulations! No Error Found.

# Evaluation

## Strengths

The Chapterly website effectively fulfills its purpose as a platform for exploring books and managing reading interests. A consistent visual design across all pages creates a professional, user-friendly experience, complemented by intuitive navigation that allows seamless transitions between the Discover, Bookshelves, Profile, and Notifications sections. Furthermore, official CSS validation confirms full compliance with web standards, underpinning a clean and visually appealing interface. This technical stability is paired with a fully responsive layout, leveraging clear typography and organized imagery to present information beautifully across all devices.

## Weaknesses

While the website functions successfully as a front-end prototype, testing revealed several technical and structural limitations. Multiple HTML validation errors persist across various pages, specifically regarding improper image naming conventions,

duplicate `<body>` tags, non-sequential heading hierarchies, and general structural markup flaws. Furthermore, the platform currently lacks advanced backend functionality, including user authentication, editable profiles, book reviews, search filtering, and dynamic content updates. The user experience is further constrained by missing form validation and confirmation alerts, which ultimately diminishes interactive feedback.

## Recommendations for Future Development

To significantly enhance functionality and user experience, several key developments should be prioritized in future iterations. Integrating a database will enable essential features such as user authentication, persistent reading progress, and personalized bookshelf management. Additionally, implementing advanced search and filtering options will allow for more efficient book discovery, while adding notification management controls, such as marking items as read or deleting them, will streamline the interface. The profile page can also be expanded to support editable user profiles, custom avatars, and reading analytics. Finally, resolving all outstanding HTML validation errors will solidify the platform's accessibility, long-term maintainability, and full compliance with web standards.

## Final Conclusion

In conclusion, Chapterly effectively achieves its primary objectives, delivering an engaging and visually cohesive platform for book enthusiasts. While currently constrained by prototype-level functionality and minor markup errors, the platform exhibits robust design consistency, intuitive navigation, and flawless CSS compliance. By implementing a dynamic backend and scaling its interactive features, Chapterly is well-positioned to evolve from a strong front-end prototype into a comprehensive, production-ready reading ecosystem.
